

# Lian Yun Gang

## US\$ 1900 of four days

### Godwit, Dowitcher and More

From 2008 to 2017, local waterbird surveyor, Han Yong Xiang recorded over 80 waterbird in three key sites as Lin Hong, Lie Zie and Qingkou River mouths. Totally 22 globally threatened waterbird species were recorded; 26 species with their largest numbers exceeding the 1% criterion.

Lian Yun Gang is undoubtedly one of the most important wader habitat in the flyway and very few visitors and barely no research by official institute.

Lian Yun Gang tour is a conservation tour to support local NGO to count the birds, record the habitat change and increase awareness.

The tour is pre-tour to Amazing Yellow Sea on September 12 to September 19, 2018. Please contact us for tour availability.

### ► Tour highlights

- Open Mudflat for over 50,000 waders
